## Why Choose Us?

A common theme we hear from fair board members and planning committees is that carnivals are notoriously difficult to work with, whether it be showing up and leaving because they didn't meet revenue goals, not showing up at all, or not allowing other entertainment options when they are at your event. We have really found our niche at small town county fairs because we can offer the same entertainment value for less cost and much less hassle.

## How do our services solve common fair complaints?

- We always show up, and show up on time!
- We do not have any rules for how you choose to fit us into your fair, and the cost of your invoice is what you pay. You will not be charged extra fees based on attendance or revenue.
- If it's not worth your time to find volunteers or you're worried about safety, you can hire us to monitor the games instead.
- Even if we are supervising the games we do not touch your money. Should you choose to charge for wristbands or tickets, we can certainly check these things for you, but we will not take any commission or touch your revenue from the admission cost.
- Lots of fairs charge participants to use the games by doing tickets or wristbands, this can help your fair make up the cost of renting the games in the first place. It's a value that makes the additional entertainment a win-win for us and you!
- We are proud of our employees and seasonal workers. We are constantly hearing that our workers look clean, make safety a priority, are attentive, and interact well with kids and their parents
